

GRAIN BOOST IN WATERWAY

Ten Cents Increase Seen in St. Lawrence Project

\$183,000,000 FOR MID WEST

Chicago Board of Trade Head Points Out Advantages

CHICAGO.—(Associated Press)—A committee to represent the grain trade in the St. Lawrence deep-sea-way project has been appointed by

Robert McDougal, president of the Chicago Board of Trade. "Full development of the inland seaway," said Chairman George S. Briggs, in announcing the committee's plans today, "would add from five to ten cents a bushel to all grain grown in the great productive area. This is based on surveys by transportation experts. It is estimated that a five-cent bushel saving on transportation cost to European countries would add \$183,000,000 to the agricultural income of the Central West. This benefit to the farmer as well as to the public generally readily can be seen. Transportation has long been a prime factor in distribution costs. A deep-sea-way would be a logical solution. The Chicago Board of Trade will work for the consummation of the waterway the same as it has supported all other sound movements in behalf of greater returns to the farmer. In the district that would bene-

fit directly by the deep-sea-way are sixteen states that pour part of their agricultural products into Chicago. These states produce three-fourths of the wheat of the country, and more than 400,000,000 bushels of wheat is handled every year by the Chicago Board of Trade. "These same states also produce 70 per cent of the corn, and half of the cattle, hogs, horses, butter, eggs, cheese and wool. They mine 85 per cent of the iron ore, 40 per cent of the copper and 60 per cent of the zinc and 45 per cent of the lead. "Chicago is the focal point of the great production area, a world rail center handling in its terminals 15,000,000 carloads of freight a year. Therefore an open water lane to the ocean would be of inestimable value to the entire nation." The one thing we don't recommend Blue Devil is leaving the beach, yet some people say they like it.
